(Affiliated to the University of Rajasthan)

## Model Simulation Developed

Creating models encourages interactive education, fosters profound comprehension, amplifies critical thinking abilities, fosters teamwork and effective exchange of ideas, and offers a pragmatic and inventive avenue for learning. Through active involvement in the model-building process, learners cultivate a more comprehensive and interconnected grasp of the topic, resulting in substantial and enduring educational achievements. The incorporation of model creation holds significant importance in the learning process for numerous compelling motives:

**Concrete Representation:** Models offer a palpable and solid depiction of theoretical notions, concepts, or systems. They render intricate or elusive ideas more approachable and comprehensible by generating a visual or tangible representation. Models enable learners to envision and engage with the subject matter, intensifying comprehension and retention.

**Active Engagement:** Model crafting necessitates proactive involvement from learners, compelling them to engage in critical thinking, scrutinize information, and employ their knowledge to formulate a model. This experiential approach fosters active learning, cultivates problem-solving skills, and sparks creativity. Through direct participation in the model-making process, learners foster a more profound comprehension of the subject matter.

**Multisensory Learning:** Models encompass various senses, including visual, tactile, and occasionally auditory aspects. This multisensory encounter enriches learning by triggering diverse regions of the brain and fortifying memory retrieval. Through the incorporation of multiple senses, models facilitate a more all-encompassing and engaging learning journey.

**Conceptualization and Visualization:** Developing a model demands learners to conceptualize the topic and convert it into a tangible or visual portrayal. This process of conceptualization and visualization enriches comprehension and aids learners in comprehending abstract notions more efficiently. Models empower learners to establish links between theoretical knowledge and real-world applications, effectively bridging the gap between theory and practice.

**Problem Solving and Critical Thinking:** Model crafting frequently entails tackling problems, making design selections, and surmounting obstacles. It stimulates learners to engage in critical thinking, analyze information, and make decisions grounded in their comprehension. Through the exposure to and resolution of challenges throughout the model-making endeavor, learners cultivate problem-solving prowess and fortify their analytical and critical thinking capabilities.

# ST. WILFRED'S P.G. COLLEGE

(Affiliated to the University of Rajasthan)

**Collaboration and Communication:** Model construction often serves as a collaborative endeavor, motivating learners to collaborate, exchange ideas, and communicate proficiently. Cooperative model making advances teamwork, negotiation, and the interchange of viewpoints. It nurtures adept communication abilities, as learners articulate their concepts, elucidate their models, and partake in dialogues with peers.

**Creativity and Expression:** Model crafting presents learners with a chance to manifest their creativity and distinct viewpoints. It stimulates learners to think in inventive ways, test diverse ideas, and delve into alternative solutions. The model-making process allows for customization and self-expression, fostering a sense of ownership and pride in the learning journey.

For this, Departments allotted some topics to students according to their syllabus. These models are displayed in Science Exhibition. In the end, Awards are given to the Best Models.

Activity Report	
Name of Activity	Science Exhibition
Date	22/11/2018
Venue	St. Wilfred's PG College
Faculty Coordinator	Dr. Nidesh Sharma, Dr. Seema Jacob
No. of Participant	397
Activity Summary	Inter collegiate Science Exhibition was organized by department of science in which more than 20 colleges from Jaipur participated. The students displayed their hidden and creative talents by Showcasing working and non-working models. Poster presentations were also displayed by the students. Winners were felicitated by Guest of Honor. It is a part of participative learning in which the students get platform to unleash their skills.

Date	08/02/2020
Venue	St. Wilfred's PG College
Faculty Coordinator	Dr. Vandana Palsaniya, Mr. Kuldeep Sharma
No. of Participant	353
Activity Summary	The department of science hosted an intercollegiate Science Exhibition, attracting over 25 colleges from Jaipur. The event provided a platform for students to exhibit their concealed and innovative abilities through functional and non-functional models. Additionally, students presented posters showcasing their ideas. The distinguished winners were honored by a Guest of Honor. This event fosters participative learning and empowers students to showcase their skills freely.

Activity Report	
Name of Activity	Science Exhibition
Date	21/01/2023
Venue	St. Wilfred's PG College
Faculty Coordinator	Mr. Rajesh Sahu, Mrs. Vandana Palsaniya
No. of Participant	257
Activity Summary	The department of science hosted an intercollegiate Science Exhibition with the participation of over 30 colleges from Jaipur. Students demonstrated their concealed and imaginative abilities by presenting operational and non-operational prototypes. Additionally, they exhibited poster presentations. The victors received recognition from the Guest of Honor. This event embodies participatory learning, offering students a platform to unleash their talents and skills.
