## E- Content

ICT can offer tremendous opportunities for capturing, storing, disseminating and communicating a wide variety of information. Rapid expansion of knowledge and availability of variety of ICT has made knowledge, inclusion and integration of ICT in teaching and learning inevitable.

A learning management system (LMS) is a software application or Web-based technology used to plan, implement, and assess a specific learning process. Typically, a learning management system provides an instructor with a way to create and deliver content, monitor student participation, and assess student performance. Our college along with the traditional Chalk and Talk method of Teaching, also utilizes paperless free online Learning Management Systems.

## Google Classroom

With Google Classroom, faculty can create classes, distribute assignments, send feedback, and see everything in one place. Teachers and students can work anywhere, anytime, and on any device. Educators can provide instant feedback and track a student's progress to improve performance Instant Paperless & Easy.

## Recorded Lectures: -

The Edmodo network enables teachers to share content, distribute quizzes, assignments, and manage communication with students, colleagues, and parents. Using Edmodo, students and teachers can reach out to one another and connect by sharing ideas, problems, and helpful tips. Edmodo is primarily a tool for within-class communication, but it also provides several ways for teachers to connect with other teachers. Edmodo is designed to give you complete control over your digital classroom.
